

Infographic Design Template

You and your lab partner are going to use ShowMe to create an Infographic to display to the class. The approach that you should take is that you are using the images that you took in the woods to “teach” the viewer about Interspecific Interactions in biological communities. Below is a list of requirements for your creation.

Define the following terms:

Competition
Predation
Carnivore
Herbivory
Parasitism
Symbiosis
Mutualism
Commensalism
Adaptation
Niche
Natural Selection

Design of Infographic:

10 Pictures
Both Group Members Contribute
Both Group members Narrate

Your job is to use your 10 pictures to show examples of either symbiotic relationships, adaptations, or method of gathering food. Be sure to explain each picture well, and to create a cohesive creation. Be creative!

Grade:
